

— A FREE EVENT —

50 FUN  
HANDS-ON  
EXHIBITS

What is life like on Mars? How can coding teach me about communication? What endangered species live in California? How does plastic end up in our ocean and what can I do about it? What does physics have to do with basketball? How are we connected to cold-blooded creatures? What is inside of a black hole? Find out the answers to these questions and more about the exciting fields of science, technology, engineering and mathematics (STEM) at the Clippers SciFest SoCal on March 22-23!

Geared toward the K-12 crowd and their families, our exhibitors will showcase exciting demos and educate students about career opportunities in STEM. Through fun and engaging hands-on activities, the next generation of innovators will test their knowledge in robotics, space travel, sports technology, physics, marine science, engineering, and so much more!

## Celebrate STEM in Los Angeles!

March 22-23, 2019  
LA Convention Center

### March 22, 2019 - Sneak Peek Friday

9am - 3pm: Open to School Groups Only

### March 23, 2019 - Expo Day

10am - 6pm: Open to the General Public

### Clippers SciFest SoCal is an event of the USA Science & Engineering Festival

Founded by the late entrepreneur Larry Bock to address the severe shortage in science and tech talent, the USA Science & Engineering Festival is held biennially in Washington, DC and is the largest celebration of science, technology, engineering and mathematics (STEM) in the country. For nearly a decade, its events and educational programs have inspired kids to pursue career opportunities in the STEM fields. The Festival team is proud to partner with the L.A. Clippers to bring a SciFest to the West Coast. Please join us at the inaugural Clippers SciFest SoCal and learn more about the DC Festival at [ussciencefestival.org](http://ussciencefestival.org).
